SUMMARY

I'm a computers & technology enthusiast who can read & write in Morse Code. Also, I'm a self-taught, experienced Android developer. Altogether, I've worked on 8 different projects and have one app with 35,000+ downloads.

EXPERIENCE

SOFTWARE DEVELOPER

TEAMIE SERVICES | JUL 2016 - PRESENT

I am a member of Android developers team that strive every day to make the app easy to use for our wide range of users in multiple countries. I work closely with other developers, designers, and senior executives.

- Re-coded entire database schema and refactored codebase.
- Revamped the entire UI.
- Added new features.
- Fixing major & minor bugs.

ANDROID DEVELOPER - INTERN

QULP INDUSTRIES | FEB 2016 - MAR 2016

Worked on the *Echo - Proximity networking* app. Where I was responsible for app front-end development and code refactoring.

ANDROID DEVELOPER - INTERN

PARKLY | SEP 2015 - OCT 2015

Worked on commercial parking app where I started the project from scratch.

PROJECTS

TEXT FACES - EMOJI KEYBOARD | OCT 2016

It is a free keyboard app for Android devices which has 200+ text emoticons like `_(\ツ)_/`

TEAMIE | JUL 2016 - PRESENT

The Teamie Android App allows you to access your learning discussions any time, anywhere with any Android device.

SASIDDIQUI.COM | JUN 2016

My online portfolio website for which I used HTML5, CSS3, Bootstrap 3 & Jekyll, hosted on Github.

APP'S PLAY PAGE LAUNCHER | MAY 2016

With this app, a user can open an app's play store page with just a tap.

APPSET - YOUR APPS COLLECTION | APR 2016

An Android app by which a user can make a collection of his favorite Android apps without downloading them. I also built the web server and database on AWS for this app.

EARTHQUAKE APP | JAN 2015

A very simple and elegant app which can help user keeping a track of worldwide earthquakes. This app fetches the data from USGS servers. Also, there are some filters and Google maps.
